Education

- | | |
|---|---------------------------------------|
| Delft University of Technology (TU Delft) , Computer Science <ul style="list-style-type: none"> • Formula-free and formula-based abstractions of max-plus-linear systems • Reachability analysis of max-plus-linear systems • VeriSiMPL toolbox to automate the abstraction of max-plus-linear systems | Delft, The Netherlands
2010 – 2014 |
| Institut Teknologi Sepuluh Nopember (ITS) , Mathematics <ul style="list-style-type: none"> • Construction of Petri nets associated with traffic lights in an intersection • Analysis of the obtained Petri nets, such as liveness, deadlocks, coverability tree, boundedness, conservation • Scilab toolbox to automate the construction of Petri nets and its analysis | Surabaya, Indonesia
2005 – 2008 |
| Institut Teknologi Sepuluh Nopember (ITS) , Mathematics <ul style="list-style-type: none"> • Analytical and empirical comparison of Golub-Kahan and QR symmetric algorithms • Implementation of Golub-Kahan and QR symmetric algorithms in Matlab | Surabaya, Indonesia
2001 – 2005 |

Experience

- | | |
|--|---|
| Nantes University , Visiting Researcher
I visited the IUT de Nantes for 2 weeks, to work with the French team involved in the PHC Nusantara (Prof. Olivier Boutin, Prof. Claude Martinez, Prof. Naly Rakoto, Prof. Said Amari, Prof. Syrine Bouazza and Abir Ben Bouzaïene). <ul style="list-style-type: none"> • We were working on mathematics and control engineering for healthcare logistics applications. • Explore some possible topics for joint research. | Nantes, France
June 2026 – July 2026
1 month |
| Tianjin University , Visiting Researcher
I visited the School of Mathematics, Tianjin University, China for 7 weeks in the China-ASEAN Scholar Program to work with Prof. Xu Genqi, Prof. Han Zhongjie and Prof. Dongyi Liu. <ul style="list-style-type: none"> • The China-ASEAN Scholar Program is a fellowship program initiated by ASEAN-China Network for Cooperation and Exchanges among Engineering and Technology Universities (ACNET-EngTech) at Tianjin University (TJU). It aims to strengthen academic collaboration between TJU and universities in ASEAN countries through providing funded short-term visit opportunity. Scholars from ASEAN countries will be hosted by one of TJU academic schools. • The objective is exploring some possible topics for joint research. | Tianjin, China
Oct 2019 – Dec 2019
3 months |
| Yazd University , Visiting Researcher
Subiono and I visited Prof. Bijan Davvaz for 2 weeks from the Department of Mathematics, Yazd University, Iran. <ul style="list-style-type: none"> • This activity is part of the World Class Professor program 2019 supported by the Ministry of Research, Technology and Higher Education, Republic of Indonesia. • The main objective is publishing a paper in high quality journal. | Yazd, Iran
June 2019 – July 2019
2 months |
| Delft University of Technology (TU Delft) , Postdoctoral Research Associate
I was working with Prof. Manuel Mazo on scheduling of networked control systems, in particular when the controller is implemented in an event-triggered implementation. | Delft, The Netherlands
June 2014 – June 2015
1 year 1 month |

Honeywell, Visiting Researcher

As a part of Advanced Methods for Building Diagnostics and Maintenance (AMBI) Project, Prof. Alessandro Abate, Prof. Sadegh Esmaeil Zadeh Soudjani, I, Prof. Ondrej Holub and Prof. Karel Macek were developing a model for building in the framework of Stochastic Hybrid Systems (SHS) and also a simple SHS, to be used as a running example.

Prague, Czech Republic

Nov 2013 – Dec 2013

2 months

Volunteer

People's Climate March, Lead Organizer

Lead organizer for the New York City branch of the People's Climate March, the largest climate march in history.

- Awarded 'Climate Hero' award by Greenpeace for my efforts organizing the march.
- Men of the year 2014 by Time magazine

Zurich, Switzerland

Apr 2014 – July 2015

Awards

Nobel Prize in Physics

Nov 1921

The Nobel Prizes are five separate prizes that, according to Alfred Nobel's will of 1895, are awarded to 'those who, during the preceding year, have conferred the greatest benefit to humankind.'

Royal Swedish Academy of Sciences

www.nobelprize.org/prizes/physics/1921/einstein/biographical

Max Planck Medal

2029

Awarded for outstanding scientific achievement
German Physical Society

Publications

Zur Elektrodynamik bewegter Körper

It concerned an interpretation of the Michelson–Morley experiment and the properties of light and time. Special relativity incorporates the principle that the speed of light is the same for all inertial observers regardless of the state of motion of the source.

Albert Einstein

en.wikisource.org/wiki/Translation:On_the_Electrodynamics_of_Moving_Bodies

Über einen die Erzeugung und Verwandlung des Lichtes betreffenden heuristischen Gesichtspunkt

In the second paper, he applied the quantum theory to light to explain the photoelectric effect. In particular, he used the idea of light quanta (photons) to explain experimental results, but stressed the importance of the experimental results. The importance of his work on the photoelectric effect earned him the Nobel Prize in Physics in 1921.

Albert Einstein

Die Grundlage der allgemeinen Relativitätstheorie

The publication of the theory of general relativity made him internationally famous. He was professor of physics at the universities of Zurich (1909–1911) and Prague (1911–1912), before he returned to ETH Zurich (1912–1914).

Quantum Computing

Jan 2018 – Jan 2018

Quantum computing is the use of quantum-mechanical phenomena such as superposition and entanglement to perform computation. Computers that perform quantum computations are known as quantum computers.

- Quantum Teleportation
- Quantum Cryptography
